FLUTTER DEVELOPER

Driven and accomplished mobile app developer with 3+ years of experience specializing in Flutter and Dart. Expert in architecting and delivering scalable, high-performance mobile applications across logistics, e-commerce, travel, and service-marketplace domains. Proficient in clean architecture, State management, RESTful API integration, and Firebase services. Adept at writing maintainable code, optimizing for performance, and working in dynamic teams to turn ideas into production-ready solutions.

SKILLS

Programing Languages	Dart, JavaScript, NodeJs
Framework & Libraries	Flutter, GetX, Provider, Firebase Suite (Auth, Firestore, Storage, Messaging), REST API, MVC & Clean Architecture
Development Tools	Figma, GitHub, Postman, Android Studio, VS Code, Flutter flvaour, Firebase Suite (Authentication, Storage, Firestore, Messaging, App Check, etc.), Google SDK, APIs.
Other Skills	API Integration, Payment Gateway, State Management, UI/UX Design, Cloud Messaging, Offline-first Architecture
Soft Skills	Problem Solving, Collaboration & Time management
Languages	Bangali, English

WORK EXPERIENCE

Mobile Applicaation Developer. January 2024 - Present
TechTrioz Solutions, Dhaka

Mobile Application Developer (Contractual) Oct 2023 – Dec 2023
Algoraamming, Dhaka.

Flutter Developer. Dec 2022 – Sep 2023
RoyalXCode, Dhaka.

PROJECTS

F1T Cloud – Multi-Tenant Gym SaaS Platform Play Store APP Store
F1T Cloud is a powerful and scalable multi-tenant SaaS platform built to modernize gym management. This all-in-one solution allows fitness centers to efficiently manage memberships, trainers, class schedules, and billing from a unified dashboard. The platform offers seamless access for both gym owners and members through an intuitive interface, ensuring a streamlined fitness experience across multiple branches.
Technologies: Flutter, Flavor, Dart, GitHub, REST API, Postman, FCM, Clean Architecture.

F1TCloud Hub – Gym Management Dashboard Play Store APP Store
The F1TCloud Hub is an advanced web-based dashboard designed for gym trainers and administrators to efficiently manage day-to-day operations. This platform enables seamless oversight of member activities, trainer schedules, class bookings, and subscription plans — all in one centralized system. Built with a focus on scalability and usability, it empowers gyms to streamline workflows, enhance member engagement, and optimize performance tracking.
Technologies: Flutter, Flavor, Dart, GitHub, REST API, Postman, Clean Architecture.

The Visit London – UK Tour Management App Play Store APP Store
The Visit London App is a comprehensive tour management platform designed to enhance the travel experience across the United Kingdom. It allows users to explore top destinations, book guided tours, and manage itineraries with ease. With its intuitive interface and real-time updates, the app connects travelers with verified tour operators, offering a smooth and reliable booking experience.
Technologies: Flutter, Dart, GitHub, REST API, Postman, Clean Architecture.

Gadget Wala – Online Electronics Store App **Play Store**

Gadget Wala is a modern eCommerce app that allows users to browse, compare, and purchase electronics securely. With a clean interface and smooth navigation, it delivers a seamless shopping experience from product discovery to checkout.

Technologies: Flutter, Dart, GitHub, REST API, Firebase, Postman.

Techtrioz Attendance App – In-House Employee Management System **Play Store** **APP Store**

The Techtrioz Attendance App streamlines employee attendance, leave requests, and early departures. Managers can approve leaves, monitor records, and share company updates efficiently through a user-friendly admin panel.

Technologies: Flutter, Dart, GitHub, REST API, Firebase, Postman.

Green Chula – Rural Cookstove Survey & Reporting App

Green Chula enables field surveyors to collect household data, track cookstove installations, and capture geo-tagged photos. The app works offline and automatically syncs data when internet is available, ensuring reliable reporting.

Technologies: Flutter, Dart, GitHub, REST API, Firebase, Postman.

SoftCar **Play Store** **APP Store**

The SoftCar App is a user-centric mobile platform designed to revolutionize the car rental experience. This innovative application enables users to effortlessly browse a diverse range of comfortable and affordable vehicles from leading car hire companies, all from the convenience of their smartphones.

Technologies: Flutter, Dart, GitHub, REST API, Postman, Firebase FCMre.

eCourier Merchant | P2P application | Agent application | Branch application **Play Store**

Developed and led the design and implementation of eCourier's Merchant, Agent, Branch, and P2P applications, focusing on efficient logistics management and seamless parcel operations. These apps feature secure authentication, real-time tracking, and intuitive interfaces to enhance user experience and operational efficiency. Implemented a scan-based processing system for streamlined operations in branch and agent apps.

Technologies: Flutter, Dart, Figma, REST API, GitHub, Postman, Firebase Cloud Messaging

Key Achievements:

- Designed and integrated a central QR code-based processing system
- Spearheaded intuitive UI/UX designs, improving user engagement and app usability.
- Conducted in-depth debugging and code reviews to maintain high-quality code standards.

REST API Chaining for usability improvement

Zoye Travel **Play Store**

The Zoye Travel App is an innovative platform designed to enhance the travel experience for users by providing a comprehensive suite of travel services at their fingertips. With a focus on convenience and user satisfaction, Zoye Travel enables travelers to plan, book, and manage their journeys effortlessly.

Technologies: Flutter, Dart, Figma, REST API, Firebase FCM, GitHub.

Zoye Vendor **Play Store**

The Zoye Vendor App is a cutting-edge mobile platform designed to streamline and enhance the operations of vendors in the travel industry. This app empowers vendors to manage their services efficiently while providing a seamless experience for their customers.

Technologies: Flutter, Dart, Figma, REST API, Firebase FCM, GitHub.

Troubleshoot **Play Store**

Introducing Troubleshoot, your comprehensive solution for household services. Offering a diverse range of over 150 expert services, this platform simplifies the process of finding and engaging verified professionals for your specific needs. From beauty and wellness to appliance repair, cleaning, pest control, shifting, car rentals, driver services, car care, painting, renovation, and electronics repair, troubleshoot is your go-to destination for seamless, reliable assistance in every aspect of household management.

Technologies: Flutter, Dart, GitHub, REST API
